

< Pending >

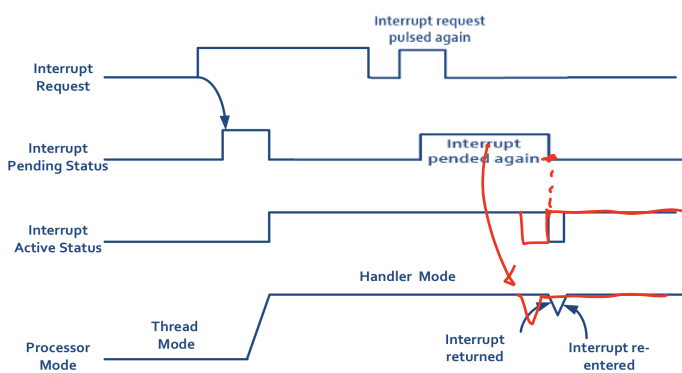

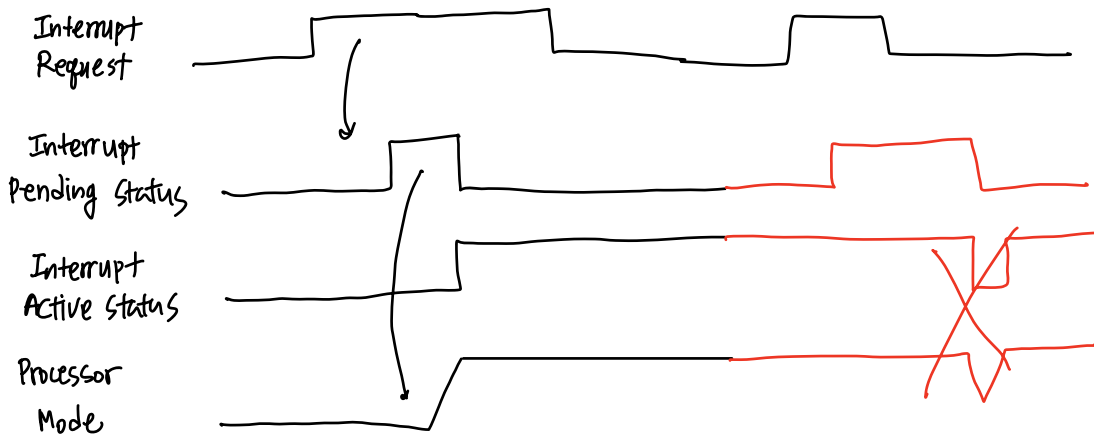

- Interrupt가 여러번 pulse 되는 경우

- 한 Interrupt source가 계속 interrupt request signal을 active로 유지하면
interrupt는 interrupt service routine이 끝날 때까지 다시 pend 될

- Interrupt service 도중에 같은 Interrupt signal이 들어면 pending 했다가 나중에 다시 handle 해줄
Interrupt handling 하는 도중 들어온 신호는 무시하지 않는다

Interrupt Pending Occurs Again During the Handler

이렇게 되어도
같은데
Handler 되고
interrupt active 되면
pend clear
